

Experiment 16: Google & WHOIS for Reconnaissance

Aim: To perform reconnaissance using Google and WHOIS to collect publicly available information about a domain.

Procedure

1. Open <https://who.is> in a web browser.
2. Enter the target domain (e.g., url.com) and click Search.
3. Open the WHOIS tab and record domain details.
4. Open the DNS Records tab and record DNS information.
5. Take screenshots of the WHOIS and DNS pages.

Observation (from your screenshot)

Field	Value
Domain Name	url.com
IP Address	172.67.169.109
Registrar Name	GoDaddy.com , LLC (verify on WHOIS page)
Registrant Name	Registration Private
Organization	Domains By Proxy, LLC
Email Address	abuse@godaddy.com

DNS Phone +1.4806242505 Email abuse [at] godaddy [dot] com Registrant Contact Name Registration Private Organization Domains By Proxy, LLC Address DomainsByProxy.com, 100 S.
